

Commercial Building Design

Now it's your job to do a lot of thinking and brainstorming about what kind of business you'd like to design. Below is the beginning of a list of types of businesses that could be interesting to design. Read the ideas that are already here, and then add 10 more ideas of your own!

<i>Radio Station</i>	Skate Shop	<i>Sandwich Shop</i>	Diner	<i>Makerspace</i>
Newspaper	<i>Glass Blowing Workshop</i>	T-Shirt Company	<i>Music Lesson Shop/Studio</i>	VR Video Game Arcade

Then, after you've brainstormed another 10 ideas, go ahead and choose one of the 20 ideas in the grid (or a different cool idea if you have one).

Brainstorm the different rooms/spaces you'll need to have in your business... A Google image search of the kinds of business your thinking of can help a lot! a list has been started below:

- *Bathrooms*
- *Office spaces*
- *Customer Parking*
- *Staff break room/kitchen*
-
-
-
-
-

Now, ask for feedback! Talk to someone at home, or do a Zoom chat with Mr. Benshoof or a classmate to get more ideas for what could be really cool to include in your business. Record your feedback and consider including it in your design!

Your last big job this week is to create two bubble diagrams of possible layouts for your commercial building. Create two different bubble diagrams, include clear labels and proper proportioning. Then either upload your bubble diagrams to AirTable or email them to Mr. Benshoof so he can check them out!
