# HOME ENGINEERING SCAVENGER HUNT

It should come as no surprise that most things in your home have been designed by some kind of engineer. It may have been a mechanical engineer that figured out how something should work, a civil engineer that figured out how something should be built, or an electrical engineer that made something function. For this scavenger hunt you need to find 16 things in your house that you know were designed or improved upon by engineers.

## WHAT TO DO:

*(Invite your brothers or sisters to help if they want something to do!)*

Look around your house and identify a thing that was probably designed, engineered, or improved upon by each of the following kinds of engineers.

Type of Engineer	Example #1	Example #2
Mechanical Engineer		
Biomedical Engineer		
Civil Engineer/Architect		
Electrical Engineer		
Computer/Software Engineer		
Aerospace Engineer		
Designer		
Chemical Engineer		

## SUBMIT YOUR IDEAS:

To share your ideas with Mr. Benshoof you have a few choices – any of these are fine!

1. Print this page at home, write your ideas on the page, and turn the page into Lathrop High School sometime in the next week. They'll deliver it to Mr. Benshoof
2. Print this page at home, write your ideas on the page, take a picture of it and then e-mail the picture to Mr. Benshoof at ([Christopher.benshoof@k12northstar.org](mailto:Christopher.benshoof@k12northstar.org)) or share it through Google Drive to that same e-mail address!
3. Enter your ideas into the Class Google Spreadsheet (<http://bit.ly/LHSEngineeringScavengerHunt>) so that everyone can see them! No printed copy necessary at all!
